## Who Attends

This course is for anyone managing or needing to understand utility drawings in order to avoid underground services and those who need to employ service location equipment in order to successfully identify various types of underground services. It is also for individuals who must manage or be aware of the imminent danger associated with hitting underground services.

## The Aim

This one-day course covers the training and assessment required for those working to safely detect utility services using recognised and approved detection methods

## Knowledge

By the end of the course the delegate will be able to:- Interpret utility drawings and line search documents- Use location equipment to locate underground services- Identify the dangers and hazards associated with underground services

## Course content

The EUSR Category 1 course content includes the following:- Plan to locate and identify services- Health, safety and environmental legislation- Company policies and procedures- Prepare resources to locate and identify services- Locate and detect services using utility plans- Risk assessments- Locating and marking positions of services- Your responsibilities- HSE Legislation- Practical session

## Card and Certification

On successful completion you will receive a EUSR accredited certificate and ID card which is valid for three years.
