W. **www.citrustraining.co.uk**

There are no upcoming public course dates available; however we can deliver this course at a date and location to suit you. Get this course from as little as £0.00 per person.

## Course Summary

Once the candidate is registered, after the profile and induction visit, they will be able to apply for a one year trade CSCS card extension. Once the delegate has completed their NVQ, their card will then last five years but is then simply renewed by a Construction Skills touch screen health and safety test and will run for a further five years. A CITB grant from 650 to 793 is available for companies registered with the Construction Industry Training Board. Delegates should inform their trainer if they have any serious health issues, physical problems, special considerations or are taking any medication which may create difficulties in undertaking elements of this NVQ assessment. Duration: The duration of a Level 6 NVQ varies depending on the candidate, their level of experience and the work they are undertaking. We advise that the majority of NVQ Level 6's are completed between 9 and 12 months from induction.

## Who Attends

Any person or employee that works in construction and needs to obtain a CSCS Black Card and a nationally recognised qualification in this trade. The candidate must have previously successfully completed a Manager's Health and Safety touch screen test within the past two years.

## Course content

Mandatory Units > Maintain health, safety and welfare in construction. > Manage the performance of teams and individuals in construction. > Chair meetings and take decisions in constructions. > Enhance working relationships in construction. > Enhance working relationships in construction. > Identify, assess and evaluate project requirements in construction. > Implement strategic and integrated supply chain management and sourcing partnerships in construction. > Analyse, monitor and optimise materials, plant and services in construction. Optional Units > Plan measured surveys in construction. >

Ascertain the condition of property in construction. > Develop and agree detailed project designs in construction. > Prepare procurement schedules and programmes of works in constructions. > Obtain tenders and appoint successful contractors in construction. > Evaluate enquiries and submit tenders in construction. > Evaluate and confirm work methods and programme. > Control contract work in construction. > Optimise and control contract progress and costs in construction. > Prepare and agree contract accounts and claims in construction. The candidate must have previously successfully completed a Manager's Health and Safety touch screen test within the past two years.

## **Methods**

The NVQ will be assessed over approximately six on-site assessments whilst the candidate carries out their day to day work. Evidence will be collected in the form of photographs, method statements and professional discussions by your dedicated Assessor.
